RCWP

Remote Computer Worker Platform

The AI employee that opens websites, servers, and email — and
completes tasks **exactly like a human.**

The Problem

Businesses waste **40%+** of labor hours on repetitive computer tasks

Manual & Repetitive

Logging into dashboards, sending emails, updating servers — done manually every day.

Expensive Outsourcing

Hiring a VA or developer costs \$15–\$50/hr for tasks that take minutes of actual thinking.

Security Risk

Sharing passwords with freelancers and VAs creates massive security and privacy exposure.

Current AI tools (ChatGPT, Claude) can *talk* about tasks —
but cannot actually DO them on a computer.

The Solution

RCWP: Your AI Employee that **actually works**

Browser Tasks

Logs into any website, fills forms, clicks buttons, publishes content, runs ads — autonomously.

Server & Code Tasks

SSH into servers, fix errors, edit files, deploy code — with a full safety layer before execution.

Email Tasks

Reads, categorizes, and responds to emails following your rules and tone.

How it works:

- 1** You describe the task in plain language
- 2** AI plans, executes step-by-step
- 3** You approve sensitive actions
-  Task completed — full report delivered

Product

Built Different — Human-in-the-Loop at every sensitive step

What makes RCWP unique:

- ✓ **Credential security:** Never stores passwords
- ✓ **Policy engine:** Dangerous actions blocked automatically
- ✓ **Live session viewer:** Watch every step as it happens
- ✓ **Full audit log:** Every action recorded with screenshots
- ✓ **Cost metering:** Pay per task, not per seat
- ✓ **Multi-model routing:** Cheapest model first
